Owners of Boats Confer With Assistant Secretary to Get Delay in Operation.

A fight to postpone the operation of the La Fo'lette seamen's law from July 1 to November 4 was begun by lake steamship owners at a conference with Assistant Secretary of Commerce Sweet today. The steamship owners already had taken an appeal to the Attorney General from a decision by Solicitor A. L. Thurman, of the Department of i. Thurman, of the Department of Commerce fixing July 1 as the effective date. They asked that further steps toward placing the new law in operation be withheld until an opinion from the Attorney General is obtained.

Conflict in the seamen's law forms the basis for the submission of the question to the Attorney General. One section of the law fixes July 1 as the date when the law shall go into effect and fixes penalties for violation. Another section placed in the bill in conference gives the steamship men eight months after the passage of the act to meet its provisions. This would make to meet its provisions. This would make the effective date November. Chairman Alexander, of the House conferees, has written a letter to the department stating that it was the legislative intent to make the law effective at the later date.

Steamship men present at today's meeting represented Cleveland, Buffalo, Detroit, and Chicago lines. E. H. Duff, of Washington, appeared for other steamship lines. The owners insist they will need until November to provide the added lifeboat and safety appliance equipment necessary to meet the previsions to serve the previsions. he provisions to enforce safety at sea Ambiguities in the law were discussed today and will be discussed at future conferences before regulations unde the new act will be announced

NEW YORK, March 23 .- Evincing at he opening the same strength that marked the market yesterday afternoon, stocks at the end of the first hour developed greater activity, and the volume of trading was increased by the entry of conservative dealers who confine their attention to the standard issues.

The market today, instead of being led by the specialties, as has recently been the case, was dominated by the rails. The specialties, however, maintained their strength and continued to attract much attention.

The particular upturn in railroad issues was led by Southern Pacific, usually regarded as international stocks.
